

Food Rescue Platform

A smart web & mobile application connecting food donors with those in need — reducing waste, fighting hunger, and building a more sustainable future.

ZERO HUNGER

RESPONSIBLE CONSUMPTION

TECH FOR GOOD

The Crisis We Can't Ignore

1.3B

Tons Wasted Yearly

Food wasted globally each year — enough to feed every hungry person on Earth.

828M

People Go Hungry

Individuals worldwide face chronic food insecurity while edible food is discarded.

40%

Food Wasted Daily

Of all food produced is lost or wasted across the supply chain every single day.

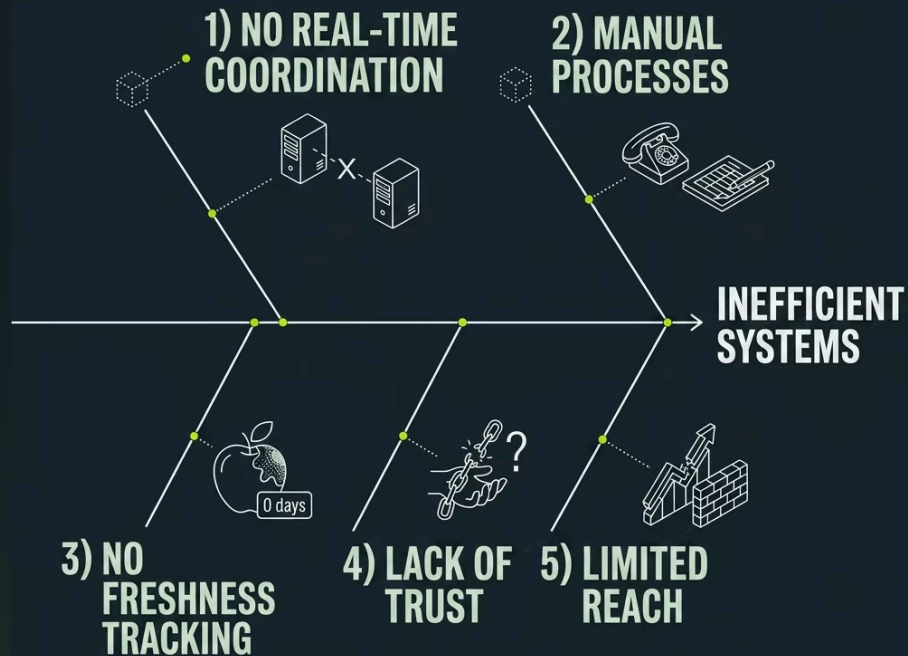

8%

Of Global Emissions

Food waste contributes to greenhouse gas emissions — more than most countries.

Why Current Systems Fall Short

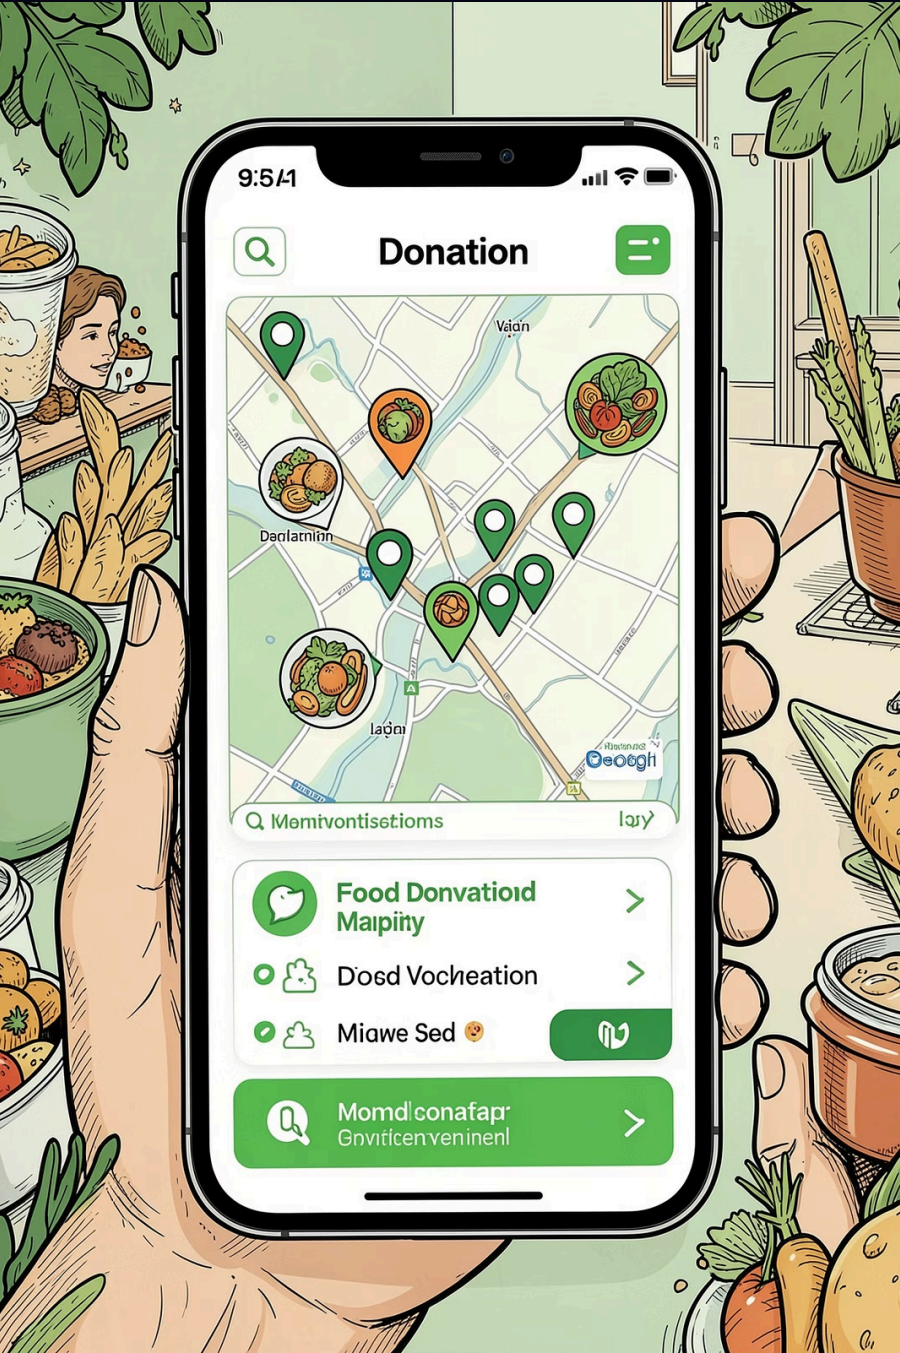

The Gap

Restaurants, hotels, and households want to donate — but there's no streamlined, trustworthy platform to connect them with NGOs and volunteers in real time. The result: perfectly good food ends up in landfills while people go hungry.

Without a digital bridge, goodwill alone cannot solve systemic food waste.

Introducing the Food Rescue Platform

A unified digital ecosystem that makes food donation effortless, transparent, and impactful — connecting every stakeholder in the food rescue chain.

Donors

Restaurants, hotels, bakeries, event organizers & households

Volunteers

Verified individuals who collect and transport food

NGOs

Organizations that distribute food to those in need

Recipients

Needy individuals and communities receiving meals

How It Works: End-to-End Workflow

From upload to delivery, every step is tracked, verified, and optimized — ensuring food reaches those who need it most before it expires.

Key Features at a Glance

Real-Time Location Tracking

Live GPS tracking for volunteers and donors — ensuring fast, efficient pickups and full transparency.

Food Expiry Timer

Smart countdown alerts notify volunteers and NGOs before food expires, prioritizing urgent pickups.

Admin Dashboard & Analytics

Comprehensive donation analytics, user management, and impact reports for administrators and NGOs.

Smart Notifications

Instant push and SMS alerts for new donations, pickup confirmations, and delivery updates.

Technology Stack

Frontend

React.js / React Native — responsive web & cross-platform mobile app

Backend

Node.js + Express — RESTful API with real-time WebSocket support

Database & Cloud

MongoDB + Firebase — scalable data storage with live sync

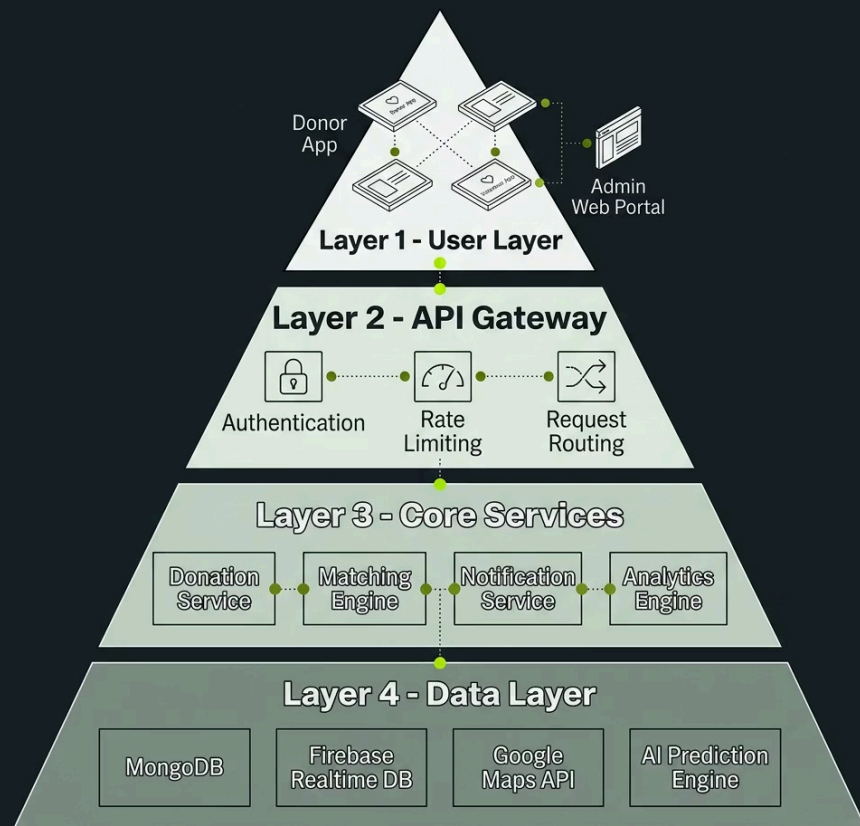

Maps & AI

Google Maps API + TensorFlow — geolocation, routing & demand prediction

System Architecture

Built for Scale & Reliability

The platform uses a microservices-inspired architecture with a centralized API gateway, ensuring security, scalability, and seamless integration across all user roles.

- JWT-based secure authentication
- Real-time data synchronization via Firebase
- AI-powered smart matching engine
- Cloud-native deployment ready

Impact & UN Sustainable Development Goals

SDG 2 – Zero Hunger

Directly connects surplus food to food-insecure communities, reducing hunger at the local level.

SDG 12 – Responsible Consumption

Diverts edible food from landfills, cutting methane emissions and promoting conscious consumption.

Social Impact

Empowers NGOs with digital tools, builds volunteer networks, and creates measurable community impact.

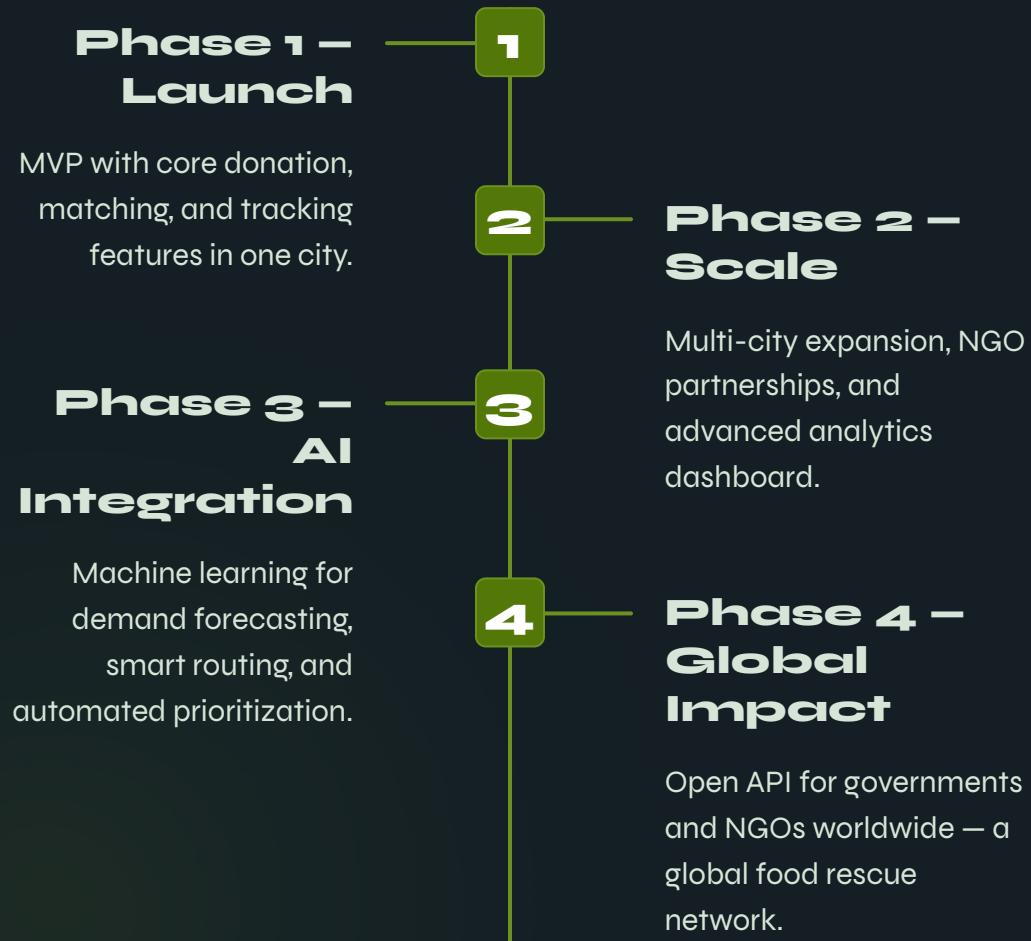

Future: AI Enhancements

Demand prediction, smart prioritization, and dynamic routing will make the platform even more effective.

The Road Ahead

Join the Movement

Food Rescue Platform is more than a project — it's a movement to eliminate the paradox of hunger amid abundance. With the right technology, empathy, and partnerships, we can make zero food waste a reality.

✓ Every meal saved is a life touched. Let's build this together.
